

Dear Doctor,

We are excited to introduce a major advancement in our denture fabrication process, transitioning from traditional analog to state-of-the-art digital dentures.

Benefits of Digital Technology:

- Superior Fit & Functionality - Digital precision enhances accuracy and patient comfort.
- Enhanced Esthetics - Advanced workflows allow for highly detailed customizations.
- Faster Turnaround Times - Streamlined production reduces delays.
- Consistency & Predictability - Digital records ensure reliable, high-quality reproduction.
- Durability & Strength - Printed and milled dentures offer superior longevity.

Our Digital Denture Options:

1. VIVID Digital Denture Economy - 3D-printed Lucitone base with multi-layer milled teeth.
2. VIVID Digital Denture Premium - 3D-printed Lucitone base with 13-layer premium milled teeth for enhanced esthetics and strength.
3. VIVID Digital Denture ULTRA - Milled Lucitone base with 13-layer premium milled teeth, Double Cross Link (DCL) technology, for the highest esthetic result.

We believe this transition will enhance your ability to provide exceptional patient care. Our team is here to support you with the digital workflow. Please reach out for more details.

Best regards,
Andrew Perricone
CEO/President
